

King County DNRP Water Quality Index

STATION **GRIFFIN** WATER YEAR **2018**

GAUGE # 21B Griffin Creek @ E Griffin Creek Rd SE

Overall Index 89

King County samples water quality in Griffin Creek (station GRIFFIN) located along E Griffin Creek Rd NE. Monitoring in this location began in 2011. Approximately 74,880 acres of predominantly forested land drain to the sampling location, though substantial amounts of forest has been cleared for timbering and residential development. The creek flows for approximately 13 miles before draining into the Snoqualmie River. Griffin Creek is also on Ecology's Category 4a list as part of the Snoqualmie River Watershed Multi-parameter (fecal coliform bacteria specifically) and Temperature TMDLs.

Annual Water Quality Index Scores

Water quality was GOOD based on data collected 10/1/2017 to 9/30/2018.

Monthly Scores For Water Year 2018

97	98	91	99	100	99	97	93	95	84	93	95

WQI Score Comparison By Water Year

About The Water Quality Index:

The Water Quality Index (WQI) score is a unit-less number ranging from 10 to 100: the higher the number, the higher the water quality. Scores are calculated from data collected during the monthly routine sampling. For temperature, pH, fecal coliform bacteria, turbidity, and dissolved oxygen, the index expresses results relative to levels required to maintain beneficial uses according to criteria in Washington's Water Quality Standards, WAC 173-201A. For nutrient and sediment measures where there are no standard, results are expressed relative to guidelines for this eco-region. Results from the eight parameters are aggregated over time to produce a single score for each sample station. In general, stations scoring 80 and above did not fail water quality standards or guidelines and are of "low concern", scores 40 to 80 indicate "moderate concern", and water quality at stations with scores below 40 are of "high concern". For more information about the WQI please visit <https://green2.kingcounty.gov/streamsdata/WQI.aspx>
